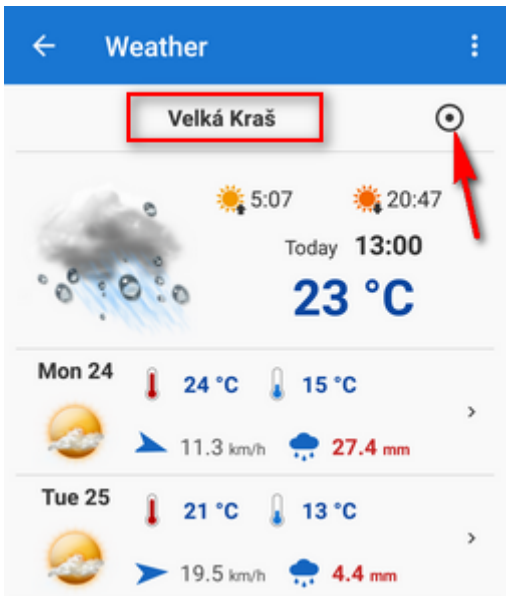
Weather

- This feature is available in Locus Map Pro only.

About

- Menu > More > Weather

Locus Map offers 7-days, 3-hour worldwide weather forecast. For any place on Earth it provides information on 3-hour and average daily temperature, precipitation, humidity, visibility, pressure, wind speed and direction, cloud coverage and sunrise/sunset times in local time. All data are provided by the World Weather Online.



Weather Forecast Screen

- **Location** - your GPS/mobile network located position is displayed by default. Other locations can be selected via the Location Selector.
- **Current weather** - information on current weather state - cloud coverage, temperature, sunrise/sunset times, humidity, visibility, pressure, precipitation and wind speed/direction
- **Today's weather forecast** - the line with expected temperature span can be unfolded into a detailed 3-hour forecast

- **Weather forecast for next 6 days** - all daily forecasts can be extended to 3-hour detailed information

- **Rain** - the icon visibility depends on the amount of precipitation. If heavy rains are expected, the precipitation number is red.
- **Wind** - visibility is similar to the rain. Plus there is the direction indicator that can be useful for cycling or other sports activities.
