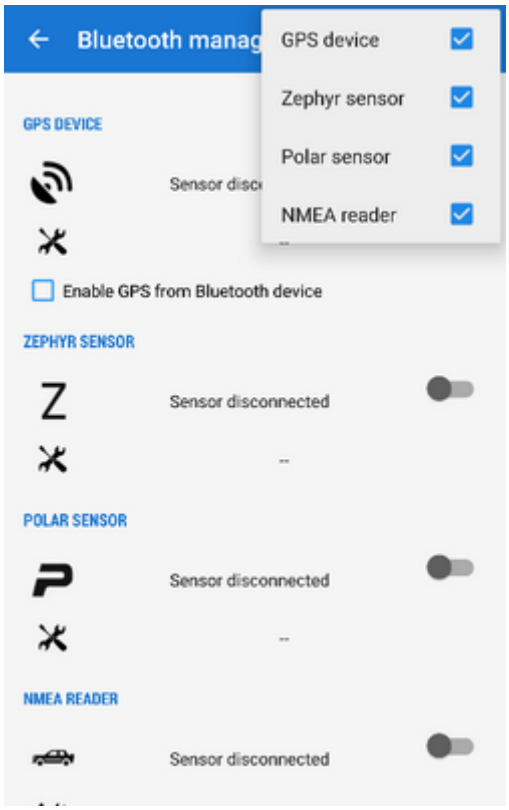
Bluetooth Manager

Use of bluetooth-connected devices (except external GPS units) is fully functional in Locus Map Pro only. In Locus Map Free, it is limited to 10 minutes.

About

Menu > More functions > Bluetooth manager



Locus Map can communicate with various Bluetooth-connected external devices - external GPS units, heart rate monitors, bicycle speed&cadence sensors, Zephyr sensors, Polar sensors and NMEA readers. Bluetooth manager displays their switches and settings.

Instructions of Use

- **topbar** - contains **menu of devices** that can be managed by Locus Map - disconnected devices can be unchecked to save space
- **list of devices** - displays all devices that are or can be connected and their switches
- **status** - displays the device status and actual data if the device is connected
- **switch on/off** - start/stop receiving data from the device
- **setting** - aborts connection with the device

List of tested and supported devices is available HERE >>
