

## How can I record my trip track?

Do you want to show the trip to your buddies? No problem with Locus Map:

- turn your GPS on. The GPS icon  must be green
- tap **Menu** and select  **Track recording**. Tap the  **green button** on the tracking panel and your track is being recorded. The recording panel can be slid back by finger and a small tab indicating the recording status remains visible on the left side. `<html><br><br></html>`
- you can see the tracking right on the map - the  blue arrow is **drawing a line**.

- when you get to the finish of your trip, tap the red  **Stop** button.

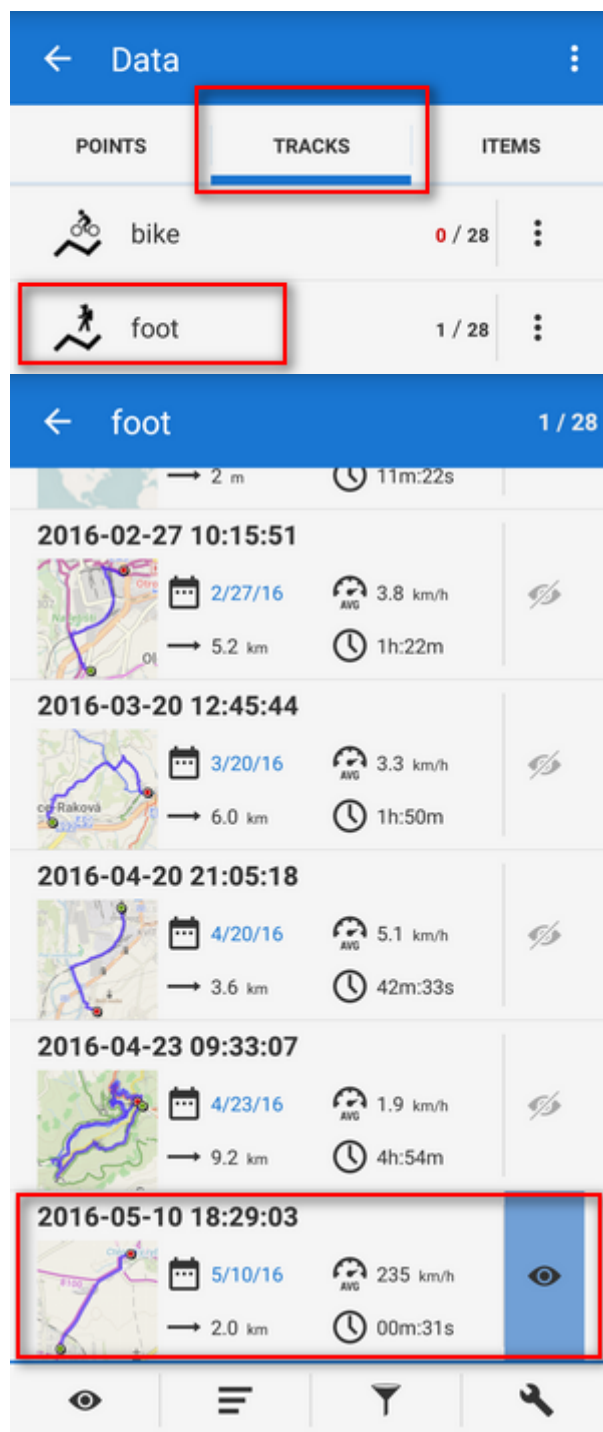

- name your trip or just leave it named by the date stamp. Select folder to store into and tap **Save**. Your trip is saved and you can boast with it to your friends.

The screenshot shows the 'Edit' screen for a track record. At the top, there's a title bar with a 'SAVE' button. Below it, there are several sections:

- NAME**: A text field containing '2016-05-10 18:29:03'.
- FOLDER**: A dropdown menu showing 'foot' with a walking icon.
- DESCRIPTION**: A text field containing 'Description'.
- STYLE ON MAP**: A section with a 'Folder' dropdown and a 'Simple color | px' option.

At the bottom, there's a yellow banner that says 'Tap to edit track style' with a close button (X).

- the track you recorded is saved in the **Tracks tab** that you can find in **Menu > Tracks**.

For more about track recording see the chapter [Track recording](#).
