POI pocket is a web and mobile application designed for planning, sharing, and synchronization of points of interest (POI). The web version allows comfortable planning and working with POI on the “big computer”. With the mobile app you have your POI always with you. Points on your mobile or tablet can be easily managed and forwarded to your car navigation or mapping applications like Locus Map.

The screenshot shows the POI pocket web interface. On the left, there is a sidebar with a list of locations and their details. On the right, there is a main content area with a title, a map, and a URL. The sidebar includes:
