Share & Export

About

This feature enables to share several ways of sharing your position to your friends:

- GPS coordinates as a text message
- map as an image
- map crop with all visible objects as a .kmz file

Share Map Center

The quickest way how to tell your friends where you are. Just send a message with your position.

The dialog hast two parts:

Plain text

• **Text to share** - pre-filled by Locus Map, contains usually GPS coordinates and can be edited later. The recipient can use your message directly to view your position in another application

or a browser.

- Additional data adds other detailed info about your position:
 - Coordinates (text) default value
 - Geohash (URL) coordinates are coded in a short URL to open in the Geohash.org website. It serves as a hub of a few position-displaying services - OpenStreetMaps, GoogleMaps, Geocaching.com, offers download of a GPX file with your position or export to a Garmin device.
 - Google Maps a direct link to Google Maps
 - Accuracy current GPS accuracy of your device
 - Altitude GPS-calculated altitude
- Share confirms action and offers available sharing services SMS, E-mail, Dropbox, Skype, Facebook etc.

KML file

- sends a .kml file with your current location for displaying in any .kml-supporting software (e.g. Google Earth)
- the line for text description is optional, the text will be included in the .kml file

Share Screen

- a very simple method of sending your device screenshot to your friends
- the feature captures a shot of the whole map screens with all displayed objects points, tracks,
- the captured image containing the map screen center EXIF info is stored in your internal memory
- all available sharing applications can be used e-mail, social networks, etc.

Export Map Content

- this feature exports all actually visible points and tracks to a .kmz file to display in an external service - e.g. Google Earth.
- the file is stored in Locus/export/ folder as sharemapcontent.kmz
