

Cooperating Apps

WhereYouGo

- made by [Independent Developers](#)
- download from [Google Play](#)

An unofficial client for [Wherigo Geocaching](#). Locus Map provides it with maps.

GPS Status&Toolbox

- made by [MobiWIA-EclipSim](#)
- download from [Google Play](#)

Displays GPS and sensor data: position and signal strength of satellites, accuracy, speed, acceleration, altitude, bearing, pitch, roll and battery state. Its tools include compass with magnetic and true north, levelling tool, marking or sharing location and navigating back later using the Radar.

It cooperates with Locus Map on displaying maps and guiding to POIs.

GPS Averaging

- made by [David Vávra](#)
- download from [Google Play](#)

Allows to save GPS location much more precisely. Great geocaching tool for placing new geocaches. Can be used to precisely pinpoint any location.

GCC - GeoCache Calculator

- made by [Eisbehr](#)
- download from [Google Play](#)

The GeoCache Calculator is a comprehensive tool for active geocachers. It contains over 250 different functions to calculate values and checksums, as well as tables and overviews for supporting outdoor geocaching search.
