Points & Tracks

Menu > Settings > Maps > Points & Tracks

POINTS

Tap on point

Sets default action after tapping a point on the map:

- *Popup* - a small information label popping right above the point, more info here >>
- *Screen* - whole screen window with all information you need, more info here >>

Points popup content

Sets the behavior and content of the point information window.

Basic setting:

- *Never* - points window appears only after tapping the point
- *On hover* - points window appears when the map is shifted over the point with the center cross
- *Always* - always visible point labels

Basic setting also switches *altitude value display* on/off.

Available context menu items:

- *Navigate to, Guide to, Compass, Edit, Hide, Delete*

Geocaching items:

- *Hint, Load all waypoints, Log your visit*

Map icons size

Sets size of icons on the map from 50 to 300% of a normal size.

TRACKS

Tap on track

Sets default action after tapping a track:

- *Popup* - a small information label popping right above the track, more info here >>
- *Screen* - whole screen window with all information about the track, more info here >>
- *Edit mode* - a small label plus bottombar with editing options

Track pop-up content

Sets a label at a track starting point:

- *Do not show* - starting point is without label
- *Simple* - label shows only date/time of start
- *Complex* - label shows date/time of start, distance passed, total positive and negative elevation

And available items in the track popup window - *trackpoint No., display on chart, track detail, edit, edit on map, navigation/guidance, hide and delete*

Track icons

Defines start/stop icons of visible tracks:

- *No symbol*
- *Dot*
- *Icon*
