Map Overlays

About

This feature enables laying **two maps over each other** in semi-transparent mode so that it is possible to compare their details, coverage, accuracy etc. This option is available only to Locus Map Pro users.

1. Select your background map

Choose from your map portfolio:

- *Online maps*
- *Personal maps*
- *Locus Maps*

2. Select your overlay map

Select the function in *Menu* > *More* > *Map Overlays*. Again you can choose any map available in the **Maps Manager**.

3. Set opacity

- Adjust opacity with the *slider* from opaque to transparent.
- Close the dialog and enjoy your two maps overlaid.
- If you want to switch the function off, tap *Remove* and close the window

Example
