

# Notification center

This is the place where **all announcements from Locus app, its developers or various actions** are displayed. E.g. when you download maps, routes or elevation data from [Locus Store](#). Or when there are some news on [Locus website](#), or when Locus reminds you of remaining [map gifts](#), informs about polls, sends messages from devs etc.

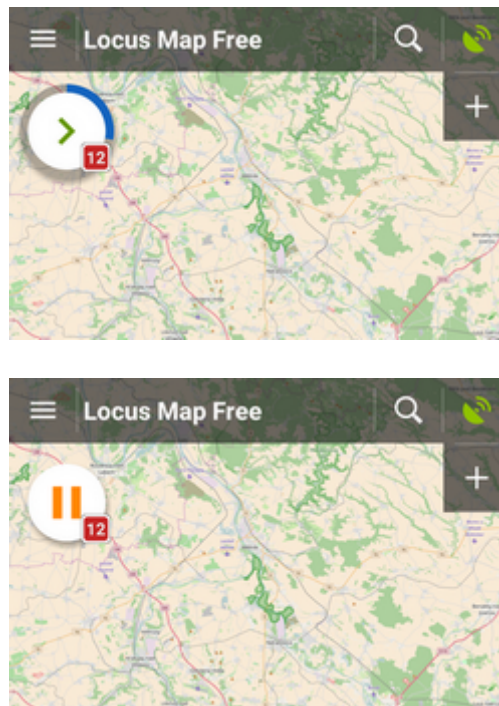

Its icon/button appears in the upper left corner of the main screen:

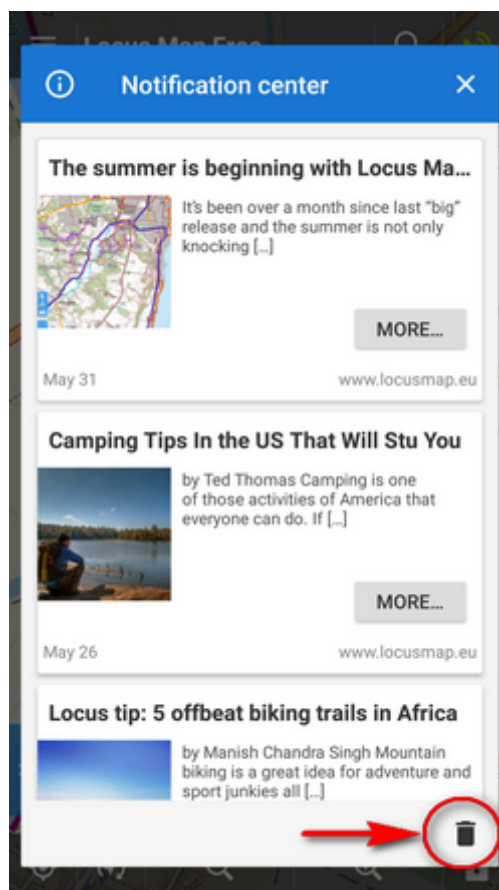

When you **tap** the button you unfold the list of announcements:

The icon/button **changes its appearance according to some actions in background**. E.g. it works as a downloading indicator:

Individual announcements can be **swiped away** from the list or the whole box can be emptied by tapping a button in its bottom:

When nothing is to be announced, the notification center button is deactivated.
