# Notification center

This is the place where **all announcements from Locus app, its developers or various actions** are displayed. E.g. when you download maps, routes or elevation data from **Locus Store**. Or when there are some news on Locus website, or when Locus reminds you of remaining map gifts, informs about polls, sends messages from devs etc.

Its icon/button appears in the upper left corner of the main screen:
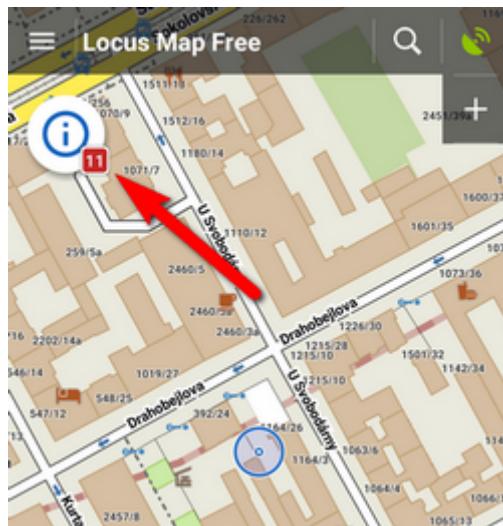

When you **tap** the button you unfold the list of announcements:
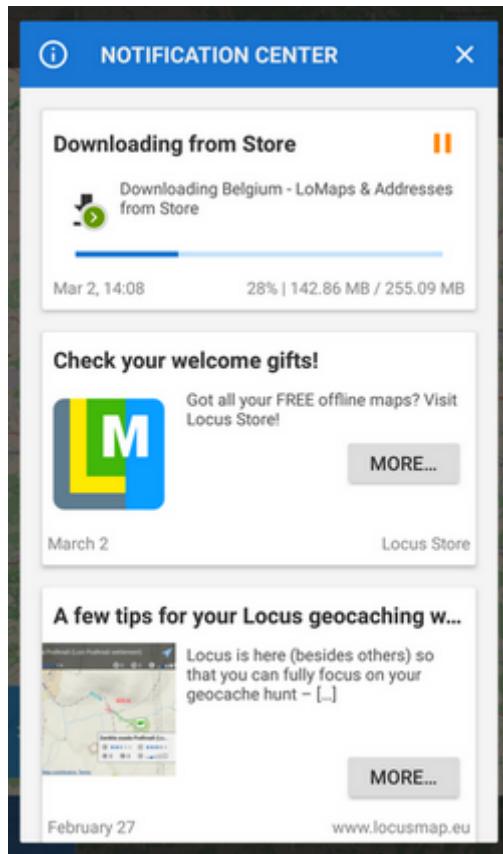

The icon/button **changes its appearance according to some actions in background**. E.g. it works as a downloading indicator:
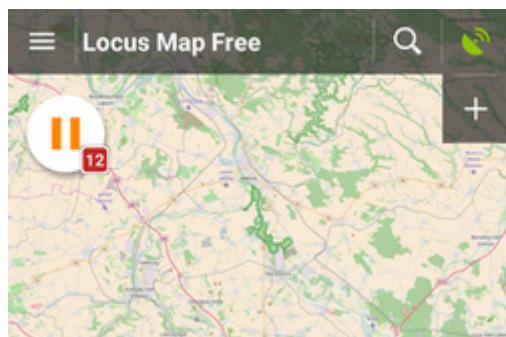

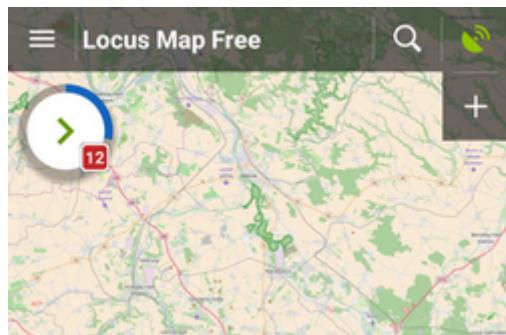

Individual announcements can be **swiped away** from the list or **the whole box can be emptied** by tapping a button in its bottom:
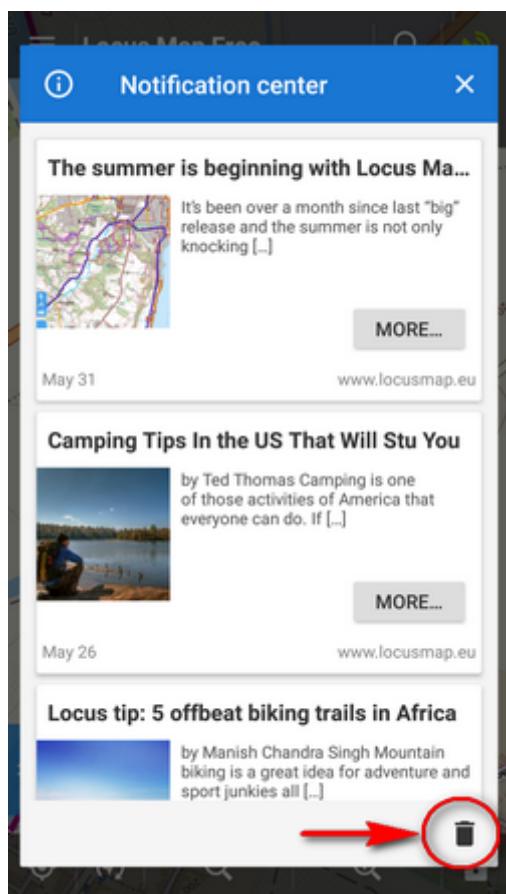

When nothing is to be announced, the notification center button is deactivated.
