Dashboards

- This feature is available in Locus Map Pro only.

About

Dashboard is an additional touch-irresponsive layer that can overlay Locus main screen. It can display various information useful e.g. for sportstracking, geocaching etc. Its main advantage is to provide user with both map and other information at once.

There are several **pre-installed dashboards** available in Locus Map, others can be **downloaded** and it is possible to **create** own dashboards.
