Point alert

⛏️ **Fix Me!** RECONSTRUCTION ⛏️ **Fix Me!**

This feature is available in Locus Map Pro only

What is it for?

This feature **notifies** you (with beeping, a custom sound, vibration or a voice phrase) when a point from a selected group is **nearby** (in the defined distance).

How to set it up?

1. Select points

- open **Folders** tab
- check the **folder with points** you want to be **notified of**:
 pic poialert3

2. Set distance and alarm frequency

- open **Basic** tab
- set **parameters**:
  pic poialert

3. Set type of notification

- open **Notification** tab
- choose **beeping, custom sound, voice phrase** (text to speech) or **vibration** - you can define your **own vibration pattern**
Point alert dialog

The dialog window is divided into three tabs:

Basic tab

- **Distance** - sets the distance in meters from a defined point to trigger the alert
- **Type of notification** - check to switch sound/vibration notifications on/off (visual notification on map stays on) and select between two types:
  - *Notify once* - the alert goes on only once
  - *Notify until stopped* - notification repeats in defined intervals until abolished manually (press STOP on screen) or out of predefined distance from the POI.
- **Pause between notifications** - relevant for "notify until stopped" - sets the interval in seconds

Notification tab

- **Settings of sound**
  - *Disable* - all sounds are disabled, notification is made by the device screen and vibrator only
  - *Beep* - notification by a beeping sound. It is possible to set number of beeps (1-10)
  - *Choose sound* - select any sound stored in your device memory
  - *Text-to-speech* - enables voice notifications rendered from predefined text commands

Tap **Play** to check your sound settings.

- **Settings of vibration** - visible only when the device is equipped by a vibrator (mainly mobile phones)
  - *Disable* - the device does not vibrate on notifications
  - *Pattern* - sets notification vibrating pattern, using three symbols: '.' for 200 miliseconds vibration, '-' for 500 miliseconds vibration and ' ' (space) for 500 miliseconds of silence.

Tap **Play** to check your vibration settings.

Folders tab

This tab specifies which points you will be notified of. Displays all folders form your Data manager Points tab:

- **topbar** - contains button to select all folders in the points tab
- **list of folders** - check/uncheck folders on which you will be alerted

Instructions of use

- Make necessary settings and tap OK button in topbar

> When the point alert function is on an icon in the system topbar indicates its activity and the information on the set distance.

- if you select *Notify once* method, you will be notified only once of the selected point. The feature remains active.
- if you select *Notify until stopped* the notification will repeat in time intervals until you stop it manually tapping the STOP button on your screen. The function remains active
- POI alert not only **makes sound and vibration alert** but also **highlights affected points** to distinguish easily which points you are alerted of
- to stop or edit point alert function, go to *Menu > More functions > point alert* again and select *Cancel* or *Edit*.

Point alert does not notify of LoPoints.
