

Offline Maps

All maps **downloaded from online mode**, obtained from **outside Locus Map** or from **Locus Store** are listed in **Offline tab of the Maps manager**.

The tab consists of a topbar with following buttons and the map list:

• Smart choice - sorting of LoMaps by countries and regions, other maps sorted according to directories:

• *Last & nearest* - sorts maps into Last used and Nearest maps folders. Nearest maps are recommended according to Locus Map's calculation of the distance between your GPS position and center of the map.

← Maj	ps	(
ONLINE	0 1	Smart c	hoice	
LAST USED	-	Last & n	earest	
Cz	ech Rep	Director	ies	
Slovakia			:

🎾 🚺 Ot os	rokowitz (Otr M - Outdoor - Hike	rokovice) e & Bike	+	

• Directories - (default) all offline maps sorted according to their storage directories

Action menu - see here >>

How to Display an Offline Map

The offline maps are listed under the topbar. Tap on the map name and in case your real position is within the map, the map launches into the **main screen**. Otherwise you are prompted that your position is outside the map and offered to have the map **centered**. If you positively know that your current position is not on the map and you want to display the map anyway, you can enter the map

Action menu and select Center map option. It shifts the map to match its center and the center of your screen. If you want to center your screen on another place in the map, Locus Map

provides **Lines that launches the Location Selector** tool with several map center redefining options.

The map's Action menu contains also:

- *Details* displaying the map name, sample preview (in case it was downloaded by Locus Map), available zooms, data size of the map file in your phone storage and description, if there is any
- **X** *Re-initialize map* tap in case your map obtained outside of Locus Map is wrongly displayed. The feature re-calibrates the map. It is essential to know the map source.
- Delete if you want to free space in your phone's memory, choose this option. The map is deleted Warning! The process is irreversible.

As is mentioned in the chapter about Online maps download, Locus Map stores downloaded maps into the **Locus/Maps directory**. It displays itself as the **Maps** folder in your Offline tab. The maps in it are sorted alphabetically as you named them.

Adding Offline Maps

← Maps		: =:
ONLINE	OFFLINE	WMS
MAPS /storage/	emulated/0/Locus/ma	aps
EUROP /storage/	E emulated/0/Locus/ma	apsVector/europe
1	Offline maps down	nload 😥
	External	naps 🕒
		×

- go to **Offline** tab of the Map manager and tap 🗾 button
- select Offline maps download if you want to add some offline maps from the Locus Store, for example LoMaps.
- select **External maps** and **add a map from your device memory**

Cloud Backup of Maps

Unlike LoMaps, maps of our commercial map partners (Swisstopo, SHOCart, Freytag&Berndt...) are downloaded directly from their servers and each such download is processed by the partner as a new map purchase. Therefore, we strongly recommend to back up your maps right after downloading. You can do so on your PC or another external storage but the most comfortable and flexible way is cloud backup.

Locus Map cooperates with **Dropbox** and **Google Drive**.

If you need to back up your map, tap the option in the **map action menu**:

Progress and result of the backup can be seen in notification center:

Cloud storage setup

When you use this option for the first time, it is necessary to **define your map backup storage**:

After allowing Dropbox or GDrive to process Locus files, **select folder**:

÷	File browser	₹ 1
	DROPBOX	GOOGLE DRIVE
÷	>	
	Locus backup	()
	Locus_APK	Select
	maps	:
	obrazky	:
	Screenshots	:
	testing	:
	tracks&points	:
•	videa	C

Cloud backup storage is set:

7/7
