# Add-on is ready, what next?

#### Firstly, congratulations!

#### **Icon**

Re-use existing base icon for Locus is recommended.

All icons are available in sample application. Available sizes are for **mdpi**, **hdpi**, **xhdpi**, **xxhdpi** and also big 512×512 icon.

Bottom left corner is ready for styling, so feel free to re-use it and update it.

Icon is available for Locus add-ons only.

### Information in Locus

Add-on may be added into list of add-ons directly in Locus Map application.

For this we need:

- icon 64×64 px
- name of add-on
- short **description**. Keep it up to around 150 chars.
- package name of your add-on
- starting point activity with LAUNCHER category

With these information we may add your add-on to the list directly in Locus Map application

## **Information on Google Play**

... and other possible Stores.

In the end of your text (listing), add

• Add-on for application Locus Map

Because this text is searched directly from Locus when users search for more add-ons!

### **Propagation**

Our Facebook, Google+, Blog on homepage are ready to write something nice about your work!
