Advanced parameters

Where is Locus root directory

1. obtain *LocusInfo* object (description in **Is Locus running** question)
2. get absolute root path by *LocusInfo.getRootDirectory()*

Which units has user set in Locus

This method is very useful, for making units in your own app same as units in Locus. Advantage is that user do not have to set units on two different places.

1. obtain *LocusInfo* object (description in **Is Locus running** question)
2. get various units parameters by *LocusInfo.getUnits...()* functions

LocusInfo contains quite a lot of interesting information from life of Locus
