How can I control Locus Map?

Locus Map's Main Screen

is covered by an **online map** which **Locus Map** automatically selected by the country you are in at the moment of installation. E.g. Hungarians see Turaterkep Classic map, New Zealanders NZTopoMaps, USGS maps are displayed to the US users etc. Anyway, you will never be left without a map, provided you are still **online**.

- you can move the map by simple **touching and dragging**, zoom it in/out by **tapping** **buttons** or by **pinching** . If you prefer single hand control, you can **double-tap and**

drag the map  to zoom it.<html>

</html>

- if you want to see your **posititon on the map**, tap the centering button  in the lower left corner. Your position is aligned with the map screen center  .

 Keep in mind that your phone **GPS must be on**. If you're not sure how to do it, look here >>

- if you want to **rotate the map** according to the built-in compass, tap the  button next to the centering and select “Rotate map”. Whether you are not sure what direction you are watching, select the  **Show view** option from the same menu.<html>

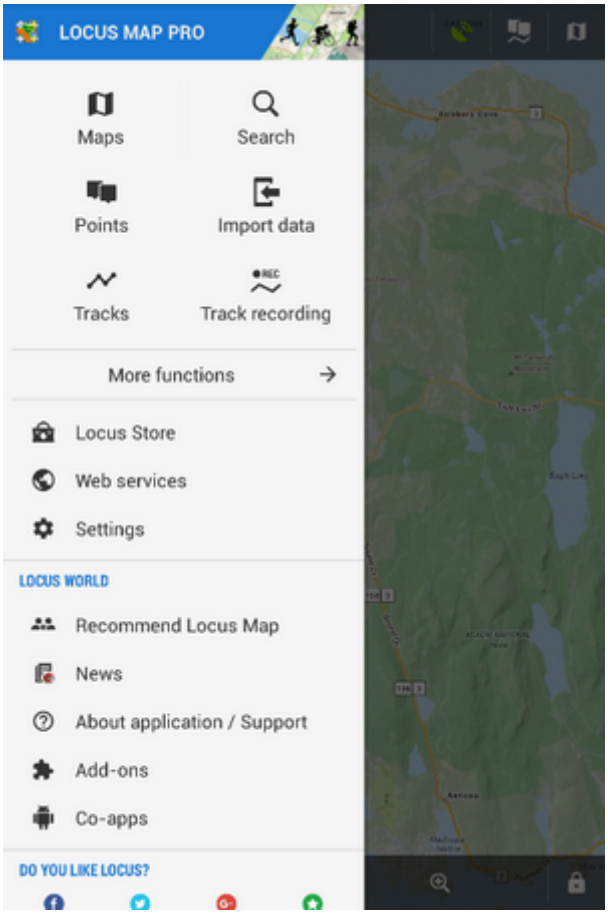

</html>
-  **locks** map zoom, all map screen and what's more, it offers also a **magnifier lens**! That your grandma will surely approve of.<html>

</html>
- if you'd like to **change the map on the screen**, tap  button in the upper right corner. It switches on the map menu that offers a wide selection of **online maps** to display and **download for offline usage**. Just choose a map you'd like to browse or travel with and tap it. A new window with the map terms of use appears, tap the “Confirm” button and **enjoy!** The selected map in the map list is highlighted in orange.<html>

</html>

 Make sure you are **connected to the internet** when you use online maps!

Main Menu

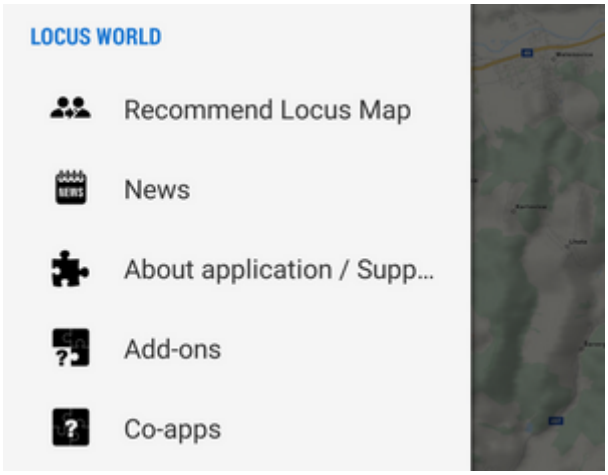

- is available after tapping the ☰ button in the **upper left corner**
- contains five buttons leading to main features - **Maps**, **Tracks**, **Points**, **Settings** and **Search** - and → **More** button, leading to other **Functions** of Locus Map.

The order and functions of these buttons can be changed by long-tapping them and selecting. See more in the Main Menu settings >>

Locus World

Another part of the Main Menu:

- **Store** - here's the place where you can **buy maps**
- **News** - RSS output from our **blog**
- **About application** - your Locus Map app version and other useful info
- **Support** - ask for **HELP** here!
- **Web services** - cooperating websites with e.g. tips for trips
- **Add-ons** - a list of available/installed Locus add-ons (e.g. for geocaching)
- **Co-apps** - a list of cooperating apps

Further details of Locus Map controlling can be found out **here >>**
