I need to be navigated to that pub on the map...

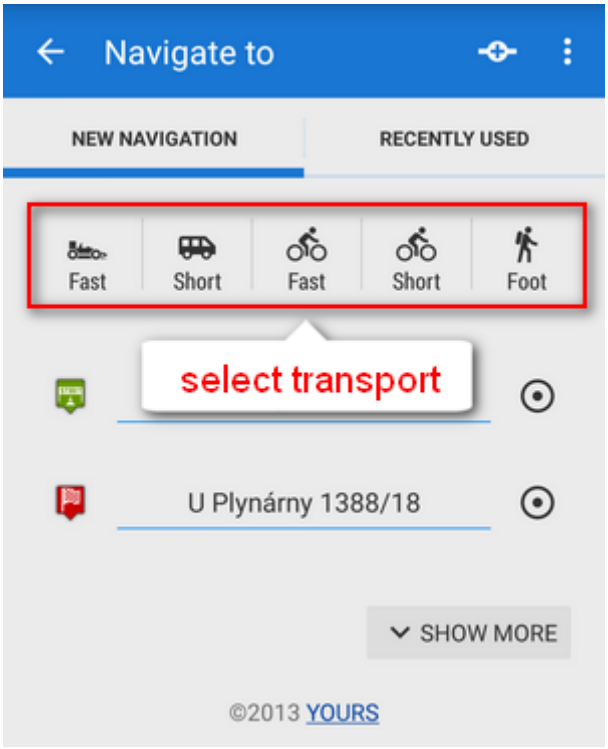

Locus Map can help, of course!

- long-tap the place on map, a label with address appears

- tap › button and select **Navigate to**<html>
</html> In default settings you must be online to get the navigation started

- select one of the offered means of transport

- route appears on map, let's go!

More about **Navigation** in Locus Map can be found **here >>**
