

## How to place a point of interest on the map?

### BTW, what is a point of interest, a.k.a. POI?

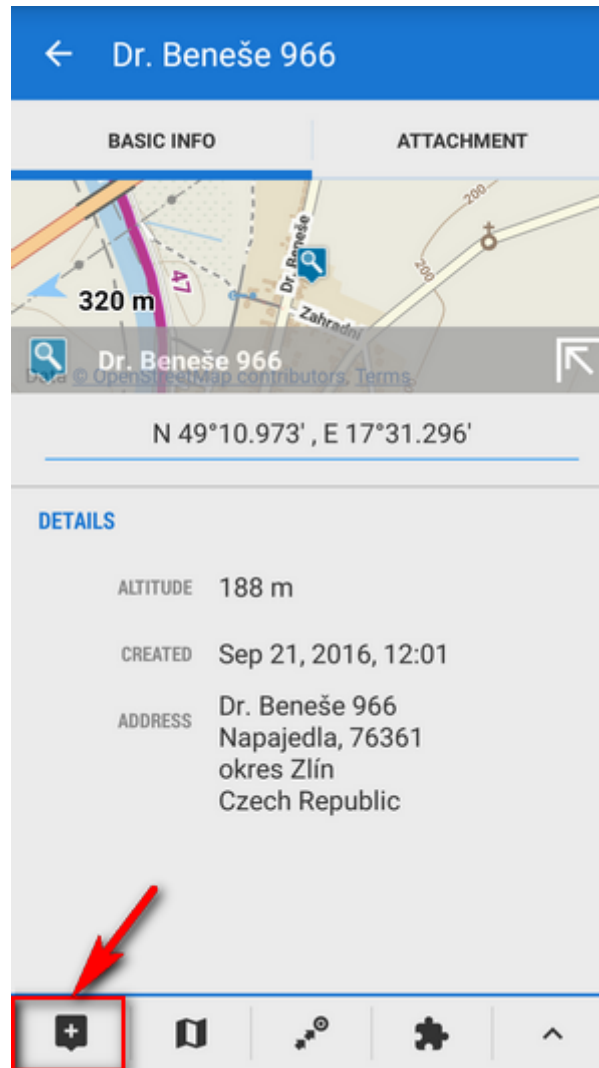

POIs are places on the map that carry some more information you are interested in. **Just tap them.** Usually they describe things like **monuments, theaters, museums, pubs, hotels** etc.

**Locus Map** allows you to place **your own POI** to mark anything you like on your trip, to show your friends your address on holidays or to let yourself navigate to it. It's simple:

- **1.** touch the screen on the place you'd like to save and hold a sec. A small frame with address appears. **2.** tap it once more to open the POI detail window.

- tap  in the left lower corner.

- edit name of your point or just leave what is in the place of name and tap **Save**.

The screenshot shows the 'Edit' screen for a POI. At the top right, a 'SAVE' button with a checkmark icon is circled in red. The screen is divided into two tabs: 'BASIC INFO' (selected) and 'ATTACHMENT'. The 'BASIC INFO' section contains several fields, each with a red asterisk indicating it is required or can be edited:

- ICON & NAME:** A dropdown menu showing 'Dr. Beneše 966' with a red asterisk.
- FOLDER:** A dropdown menu showing 'various' with a red asterisk and a '0 / 31' indicator.
- LOCATION:** A text field showing coordinates 'N 49°10.973', E 17°31.296' with a red asterisk and a location icon.
- DESCRIPTION:** A text field with the placeholder 'Description' and a red asterisk.
- ELEVATION:** A text field showing '188.087' with a red asterisk, a unit selector 'm', and a 'GET' button.
- ADDRESS:** A section header.
- STREET:** A text field showing 'Dr. Beneše 966' with a red asterisk. A red arrow points to a red asterisk on the right side of this field.
- CITY:** A text field.

\* all these items can be edited

POIs are listed in the  Data manager Points tab right next to your tracks.

The screenshot shows the 'Data' screen in LocusMap. The 'POINTS' tab is selected and highlighted with a red box. The screen displays a list of POI categories with their respective icons, names, counts, and menu icons:

Icon	Name	Count	Menu
	caches	0 / 409	⋮
	castles	0 / 8	⋮
	photos	0 / 10	⋮
	various	0 / 31	⋮
