

How can I record my trip track?

Do you want to show the trip to your buddies? No problem with Locus Map:

- turn your GPS on. The GPS icon  must be green
- tap **Menu** and select  **Track recording**. Tap the  **green button** on the tracking panel and your track is being recorded. The recording panel can be slid back by finger and a small tab indicating the recording status remains visible on the left side.
- you can see the tracking right on the map - the  blue arrow is **drawing a line**.

- when you get to the finish of your trip, tap the red  **Stop** button.

- name your trip or just leave it named by the date stamp. Select folder to store into and tap **Save**. Your trip is saved and you can boast with it to your friends.

The screenshot shows the 'Edit' screen for a track record. At the top, there's an 'Edit' title, a 'SAVE' button with a checkmark, and a menu icon. Below this is a 'NAME' field with the text '2016-05-10 18:29:03'. Below the name field is a 'FOLDER' field with a walking icon and the text 'foot'. To the right of the folder field is a counter '0 / 27'. Below the folder field is a 'DESCRIPTION' field with the text 'Description'. Below the description field is a 'STYLE ON MAP' section with a 'Folder' label and a 'Simple color | px' label. At the bottom, there's a yellow button that says 'Tap to edit track style' with a close icon.

- the track you recorded is saved in the **Tracks tab** that you can find in **Menu > Tracks**.

For more about track recording see the chapter [Track recording](#).
