How can I record my trip track?

Do you want to show the trip to your buddies? No problem with Locus Map:

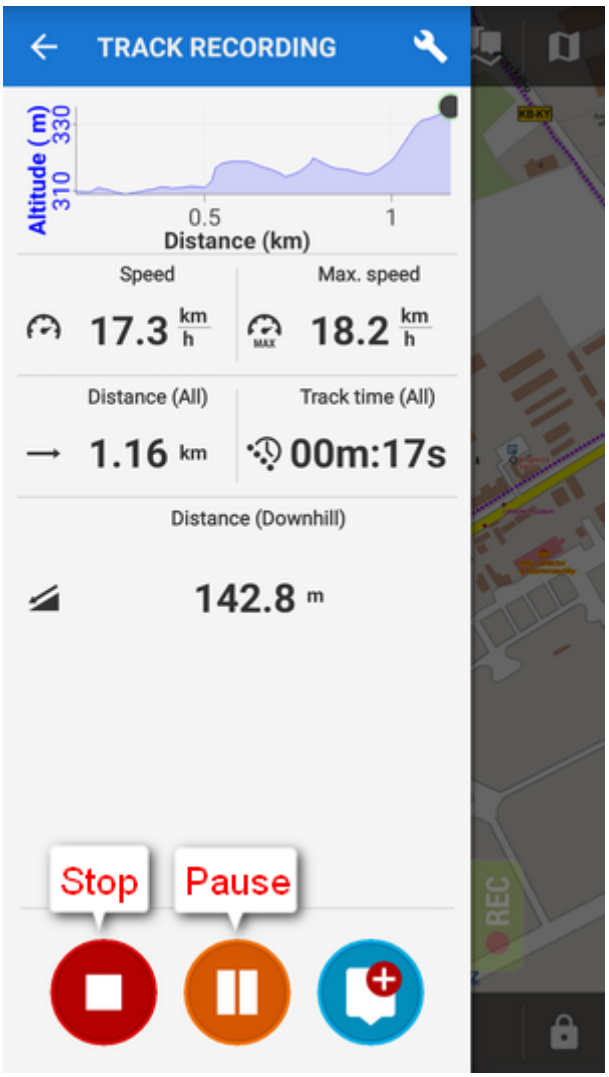

- turn GPS on your device on. The GPS icon must be green
- tap **Menu** and select **Track recording**. Tap the **green button** on the tracking panel and Locus starts recording your track. The recording panel can be slid back by finger and a small tab indicating the recording status remains visible on the left side.

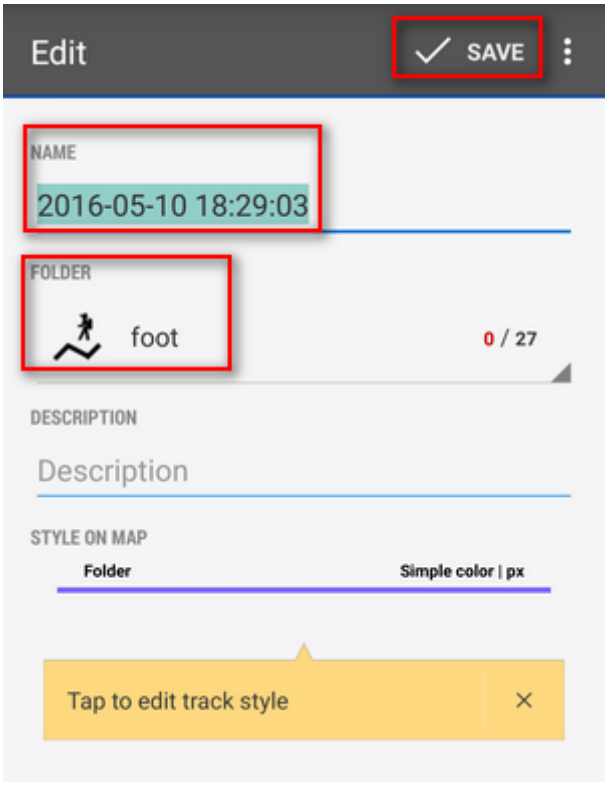

- you can see the tracking right on the map - the blue arrow is **drawing a line**.

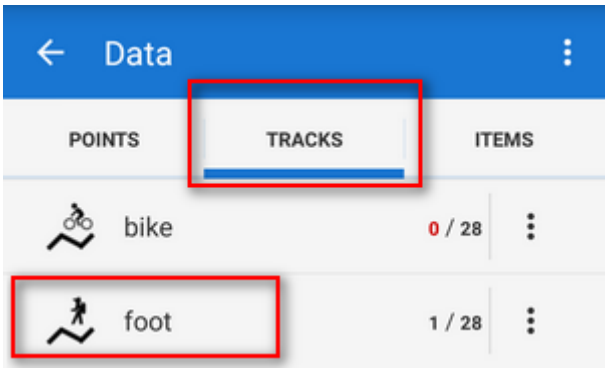

- when you get to the finish of your trip, tap the red **Stop** button.

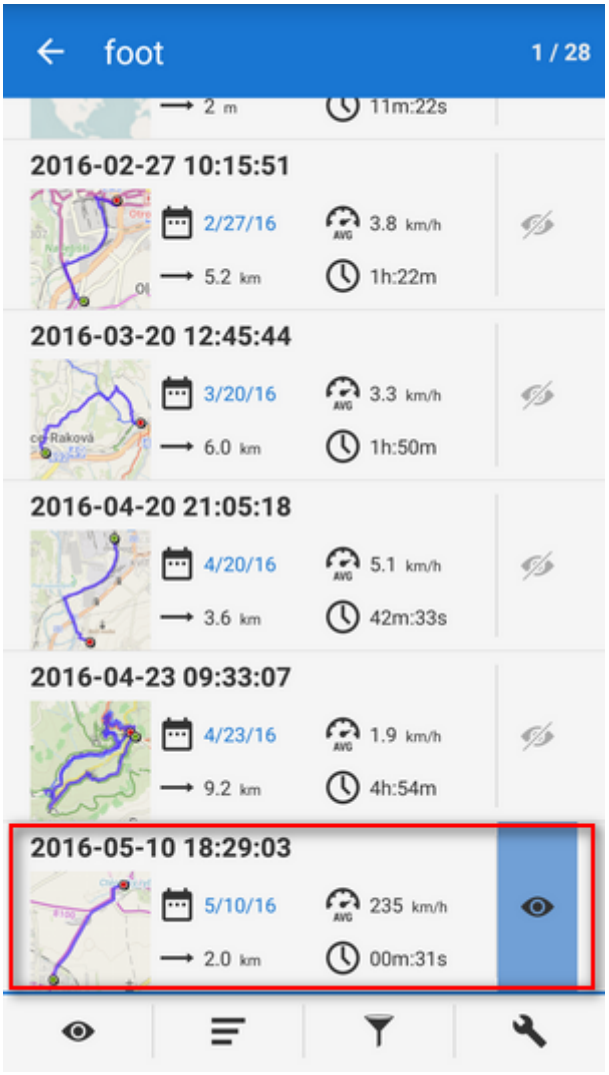

- name your trip or just leave it named by the date stamp. Select folder to store into and tap **Save**. Your trip is saved and you can boast with it to your friends.

- the track you recorded is saved in the **Tracks tab** that you can find in **Menu > Tracks.**

For more about track recording see the chapter Track recording.
