

How can I record my trip track?

Do you want to show the trip to your buddies? No problem with Locus Map:

- turn GPS on your device on. The GPS icon must be green
- tap **Menu** and select **Track recording**. Tap the **green button** on the tracking panel and Locus starts recording your track. The recording panel can be slid back by finger and a small tab indicating the recording status remains visible on the left side.

• you can see the tracking right on the map - the \triangle blue arrow is **drawing a line**.

• when you get to the finish of your trip, tap the red Stop button.

• name your track or just leave it named by the date stamp. Select folder to store into and tap Save. Your trip is saved and you can boast with it to your friends.
