

How can I record my trip track?

Do you want to show the trip to your buddies? No problem with Locus Map:

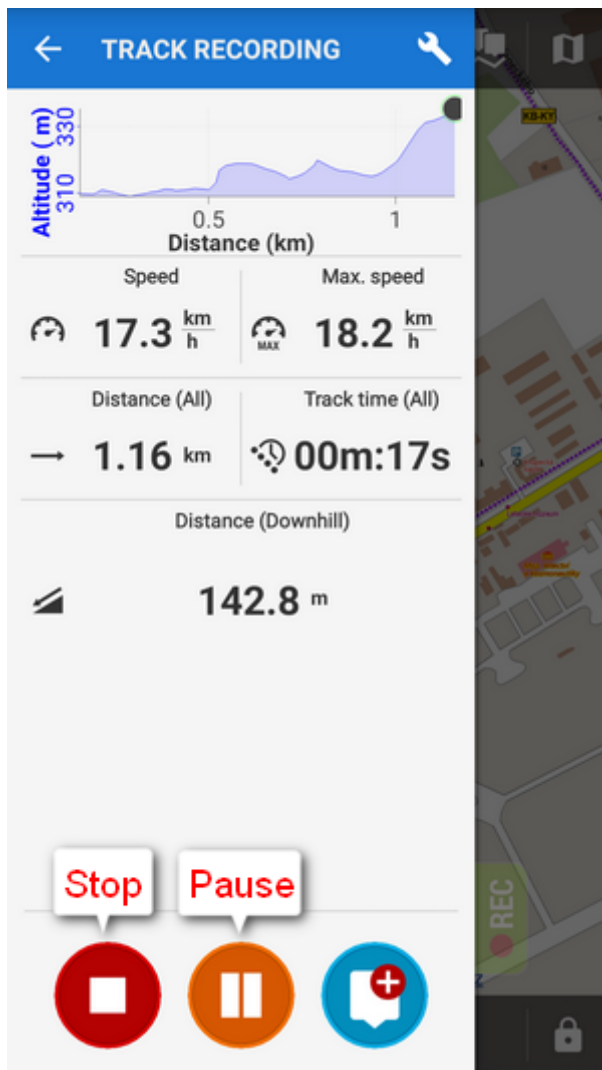

- check your device GPS is on - The GPS icon  must be green
- tap  **Menu** and then  **Track recording**.

- Select recording profile according to your activity - hike, bike, car etc. **(1)**

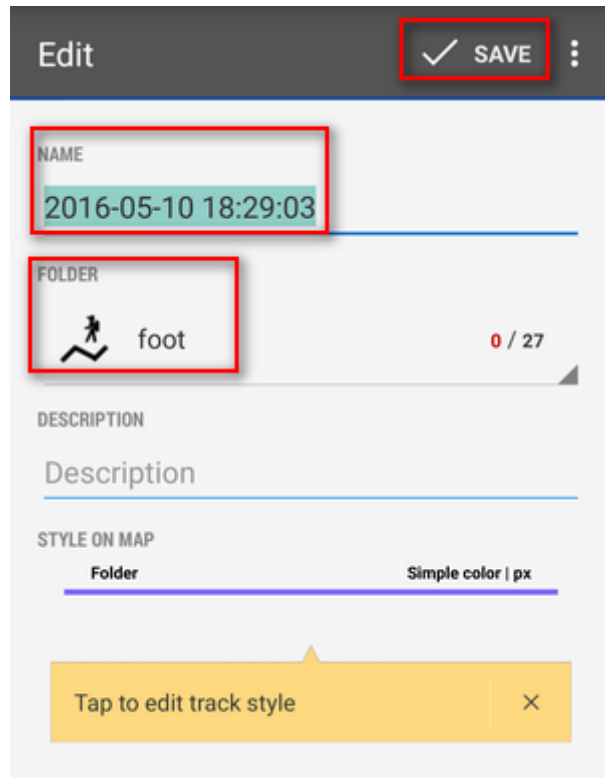

- Tap the  **green button (2)** on the tracking panel and Locus starts recording your track.
- The recording-start panel changes into a recording-monitoring panel that can be slid back by finger and a small tab indicating the recording status remains visible on the left side.

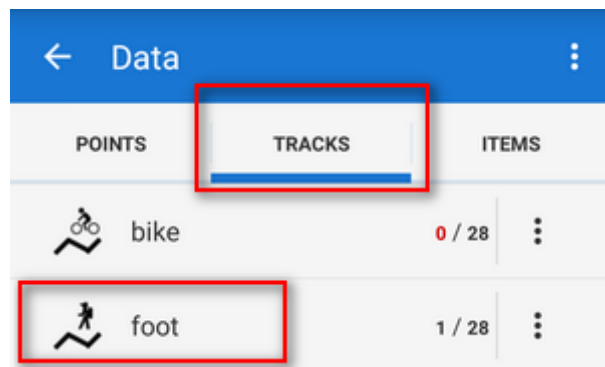

- you can see the tracking right on the map - the  blue arrow is **drawing a line**.

- when you get to the finish of your trip, tap the red  **Stop** button.
- **name** your track or just leave it named by the date stamp. Select **folder** to store into and tap **Save**. Your trip is saved and you can boast with it to your friends.

- the track you recorded is saved in the **Tracks tab** that you can find in **Menu > Tracks**.

For more about track recording see the chapter [Track recording](#).
