What's Locus Map?

Like going for a **bike ride**? Or **hiking in the mountains**? What about **looking for geocaches** in your neighborhood? Or **visiting a city** you've never been to before? Then **Locus Map** is your true companion! It shows you where you are in the middle of nowhere on an offline map, guides you through a geocache hunt or navigates you along the streets to the newly opened sushi restaurant. And many more! Record your favourite **bike tracks**, store your **trip highlights**, export your **daily runs** directly to **Runkeeper** or other services. **Locus Map** surprises you every day, it's loaded with functions you haven't ever expected you would need sometimes. For example you'll never forget where you **parked your car** in front of a big mall. So here we go!

For your first steps with Locus Map see the tutorial:
