Why does Locus Map Pro not work when I uninstall Google Play Store (or Amazon App Store)?

Locus Map Pro is an application with a **paid license** that is validated upon its first start after installation and then occasionally when updating some additional data. **The validation needs internet connection and Google Play Store (or respectively Amazon App Store) installed on your device.**

Do not uninstall Google Play Store or Amazon App Store from your device - your Locus Map Pro will stop working because its licence can not be validated.
