

# Moving Locus to another phone or tablet

RECONSTRUCTION

You have purchased a new mobile or tablet. Follow the instructions how to move Locus into the new device and continue using all the data and settings:

## Instructions

### Step 1. - backup

#### Make full backup of your settings, points, and tracks

- open [Backup manager](#)
- select **Backup all**
- [share the backup file](#) to some cloud storage (Dropbox, Google Drive etc.)

#### Back up your maps

- open Locus map manager > offline tab
- **backup all maps** that could be lost when the app is uninstalled (especially the **raster maps purchased from commercial publishers**) to [Dropbox or Google Drive](#). ===== **Step 2. - installation** ===== \* **install the latest version of Locus Map to the new device** \* **start Locus Map on your new device** \* **use Backup manager to restore settings, points and tracks from the cloud** \* **define paths to your external maps by** Map manager > Add external maps \* **define path to your vector maps in** Settings > Miscellaneous > Default directories > Set mapsVector **directory** ===== **Step 2. - copy data** ===== \* **copy the entire Locus directory from PC (Dropbox etc.) to the inner memory of your new device** \* **copy your external maps and vector maps to the new device (inner memory or external SD)** ===== **Step 3. - installation** ===== \* **install the latest version of Locus Map to the new device** \* **start Locus Map on your new device** \* **use Backup feature to restore settings, points and tracks** \* **define paths to your external maps by** Map manager > Add external maps \* **define path to your vector maps in** Settings > Miscellaneous > Default directories > Set mapsVector\*\* directory
