

# Moving Locus to another phone or tablet

You have purchased a new mobile or tablet. Follow the instructions how to move Locus into the new device and continue using all the data and settings:

## Instructions

### Step 1. - backup

#### Make full backup of your settings, points, and tracks

- open **Backup manager**
- select **Backup all**
- **share the backup file** to some cloud storage (Dropbox, Google Drive etc.)

#### Back up your maps

- open Locus map manager > offline tab
- **backup all maps** that could be lost when the app is uninstalled (especially the **raster maps purchased from commercial publishers**) to **Dropbox or Google Drive**.

You don't have to back up **LoMaps**. These can be re-download from **Locus Store** for free.

==== Step 2. - installation ==== \* install the latest version of Locus Map to the new device \* start Locus Map on your new device ==== Step 3. - restore your data ==== \* go to **Backup manager** and restore **settings, points and tracks from the cloud**. \* **open** Dropbox or Google Drive **where you backed up the maps and copy the map files to Locus/Maps directory (or wherever else you need - then add them to Locus as externals)** \* **re-download LoMaps from Locus Store** \* **go to Backup manager and restore\*\* settings, points and tracks from the cloud**

- restart Locus Map so that all the backups are properly re-initialized
