

POI Pocket

- made by [Jan Laš](#)
- download from [Google Play](#)

POI pocket is a web and mobile application designed for planning, sharing, and synchronization of points of interest (POI). The web version allows comfortable planning and working with POI on the “big computer”. With the mobile app you have your POI always with you. Points on your mobile or tablet can be easily managed and forwarded to your car navigation or mapping applications like Locus Map.

For detailed information and help visit www.POIpocket.com
