2025/11/04 05:15 1/5 Navigation Along a Route

# **Navigation Along a Route**

Unlike in **Navigate to...** feature where the route is calculated from start to end by a routing service, **Navigation along a route navigates recorded tracks, imported or planned routes** stored in your own Locus track/route database.

### 1. Select a Route

#### From Track/route manager

1. select a route and tap it to display its detail screen >>

2. tap navigation button in the bottom panel and select Navigation

### On map

1. find your route on map and tap it

2. tap on the popup

3. select Navigation/guidance > Navigation

4. check **Navigate from selected point** if you want to be navigated from the place you tapped. Otherwise you'll be navigated from the nearest place on the route to your actual location

2025/11/04 05:15 3/5 Navigation Along a Route

Locus Map **automatically generates navigation commands** along the route in places of the most remarkable direction changes.

#### **Reverse direction**

To be navigated in **reverse direction** of the route, check "Navigate reversely":

Navigation commands on a reversed route may not reflect traffic situation accurately. **Recommended for offroad use only!** 

## 2. START Navigation

At the start of the route

https://docs.locusmap.eu/ Printed on 2025/11/04 05:15

2025/11/04 05:15 5/5 Navigation Along a Route

Away from the start of the route

In this case Locus guides you to the nearest point on your route.

Away from the start of the route - auto recalculation
 If you have auto-recalculation with route priority set, the selected routing service calculates route to the start of your navigated route.

Auto-recalculation with point priority ignores your selected route and creates a new route to the nearest via point or directly to the finish.
