Parking

About

You know the situation when you park your car in a vast parking in front of a mall or in a stuffed city center. Then you do your weekly shopping or a business meeting and with an overloaded shopping cart start looking for the place you saw your tin buddy on last time. Locus Map offers help - pinpoints your car GPS location, adds a geotagged photo and even notices you when your parking ticket is about to expire!

Parking Dialog

Dialog is divided into two tabs:

Basic tab

- **Location** - GPS coordinates of your car. You can edit them by various methods of the Location Selector
- **Parked at** - date and time of your parking (current time is default)
- **Parking hours** - interval of your parking ticket
- **Description** - option to type a few words about your parking place
- **Parking photo** - option to take a photo of your parking place

Notification tab

When your parking ticket or allowed parking interval is about to expire, Locus Map can notify you - check **Play alarm** option.

- Settings of sound
  - Disable - all sounds are disabled, notification is made by the device screen and vibrator only
  - Beep - notification by a beeping sound. It is possible to set number of beeps (1-10)
  - Choose sound - select a sound stored in your device memory
