# Weather

- This feature is available in Locus Map Pro only.
- Menu > More functions > Weather

Locus Map offers 7-days, 3-hour worldwide weather forecast. For any place on Earth it provides information on 3-hour and average daily temperature, precipitation, humidity, visibility, pressure, wind speed and direction, cloud coverage and sunrise/sunset times in local time. All data are provided by Dark Sky.

## **Instructions**

1. point your **map screen cursor** at the place of the weather forecast (or find the position with **location selector**). If you want to know the forecast of the place you are standing in at the

moment and you have GPS fix, tap the map centering button

2. tap Menu > More functions > Weather

## **Weather Forecast Screen**

#### **Overall view**

• **Location** - Locus displays forecast of the nearest place to your selected location the online database knows name of. Other locations can be selected via the Location Selector .

- **Current weather** information on current weather state cloud coverage, temperature, sunrise/sunset times
- **Today's weather forecast** the line with expected forecast for the day highest/lowest expected temperature, wind speed/direction, expected precipitation tapping the day line you can open a detailed 3-hours forecast with a meteogram
- Weather forecast for next 6 days all daily forecasts can be extended to 3-hour detailed information
