Map Screen Settings

Quick Map Switch

A very useful feature of the Maps Manager if you work with various types of maps at once. It offers your last used online maps, nearest personal and vector maps to your position at one tap to switch among them. This setting influences when the Switch appears in the upper left corner of the screen:

- **Never** the Swich never appears
- Out of map the Switch appears only if you get outside of the active map allows quick map centering or a map change
- Always the Switch is always visible on the screen

Use Hardware Buttons

Volume controlling hardware buttons can be used to zoom the map. There is no need to take your gloves off on cold days!

Enable Address Search
