Each folder entry includes a status indicator showing the count of items (e.g., '0 / 557') and a three-dot menu icon. A large blue circular button with a white plus sign is located at the bottom right of the list area.

POINTS		TRACKS
	caches	0 / 557
	castles	0 / 8

Points Folder

After tapping a folder name in the manager the points display in a vertical list:

Its **topbar** displays visible/total number of points:

Each line consists of:

- *icon* (1) - either the same as the folder in case the point is created by you or different in case the point is imported - **tapping the icon displays the point on map**
- *point name* (2) - tapping it opens a **point detail screen**
- *bearing and distance* (3) to the point from the current position of the map cursor

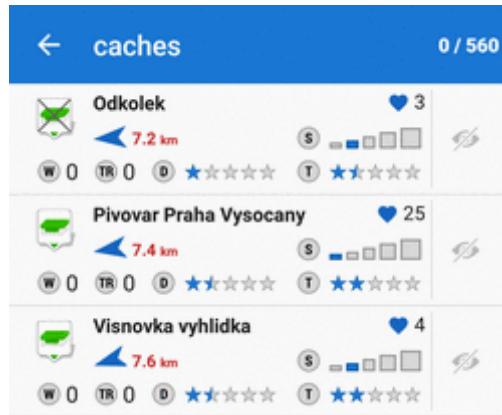

-  visibility button (4) - switches point in/visibility on the map - button is highlighted **blue** when the point is shown on map

How to display points on map

Single point

- OR
- tap the “eye” button  :

To remove the point from map (not from the database), tap  again.

Multiple points

Use one of multiselecting options:

The screenshot shows a list of geocaches in a folder named 'caches'. Each entry includes the cache name, location (e.g., 'Visnovka vyhlidka' at 3.4 km), a heart icon indicating popularity (4), and a 'hand' icon for managing the folder. Below the list is a toolbar with several icons: a shield, a red eye (highlighted with a red box), a list, a filter, and a magnifying glass. A red arrow points to the eye icon, indicating its function.

- *Hide all* - makes **all points** in the folder **invisible** on the map
- *First X points* - shows a **predefined number** of first points in the list (50, 100, 200... points)
- *Show all* - makes **all points** in the folder **visible** on the map
- *Invert* - inverts current selection, useful when you want to select almost all points except some. Select those and then invert the selection.
