

Quick Settings

About

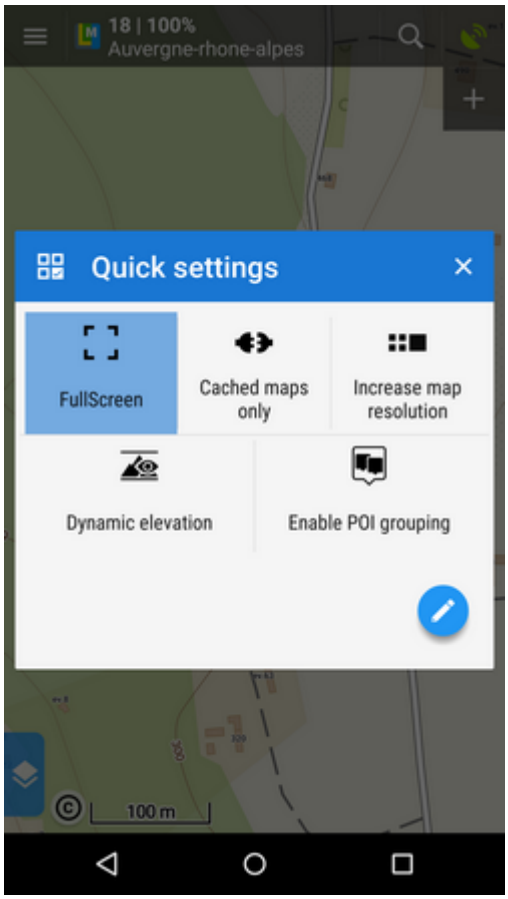

- Menu > More > Quick Settings

Quick Settings button enables direct and fast switch of several settings options. It is accessible from the main menu or can be placed in some of the Function Panels for even quicker access.

Quick Settings Window

Consists of a grid of the most used settings shortcuts. The grid is fully customizable:

- **adding buttons** - displays a wide range of settings to link to
- **removing buttons** - long-tap the item you want to remove and select “Remove”
- **sorting buttons** - you can freely tap-drag-drop the buttons to change their order (available from the Android 3.0+ version)

The settings linked by the Quick Settings are launched by tapping the buttons immediately without further confirmation.

Available Settings Shortcuts

- Fullscreen - hides system panel
- Screen On/Off Control - sets turning the screen on/off by gestures or by the application - Locus Map Pro only
- Always Screen On - enables permanent screen on
- Enable Address Search - searches addresses by long-tapping the map screen
- Shift Map Center - moves the map center crosshair down by 1/4 of the screen - Locus Map

Pro only

-  Time Rings - displays rings indication estimated distance passed according to current speed
-  Distance Rings - displays rings indicating various distances from current position
-  Dynamic Altitude - displays altitude at the map screen center
-  Enable POI grouping - groups POI into a single object at lower zooms for faster map drawing
-  Offline Mode - uses cached map tiles only
-  Change Map Resolution - displays map with changed resolution
-  Map Shading - enables additional shading of map based on elevation files - Locus Map Pro only
-  Map Color Mode - adjusts map contrast, turns night mode on etc.
-  Auto-zoom - enables automatic zoom change depending on current speed - Locus Map Pro only
