Altitude Manager

☐ ??

Settings

Altitude offset

- **Use altitude offset** - defines offset between real and GPS altitude. More in the **Offset tab**.

Pressure sensor

- **Use pressure sensor** - measures precise altitude by the device in-built pressure sensor More in the **Pressure tab**.

Elevation data

- **Optimize GPS altitude** - uses offline elevation data to optimize GPS altitude values

Altitude filter

- Filter - applies filter to altitude. Heavier filters cause less fuzzy altitude values but slower reaction on altitude changes. Scale from no filtration to an ultra heavy filter.

Offset

..... Enable Altitude offset in settings tab before setting offset parameters. ...

Pressure ..... Enable Pressure sensor in settings tab before setting pressure parameters.

Automatic Automatic calibration according to GPS
