

ANT+ Manager

Use of ANT+-connected devices is fully functional in Locus Map Pro only. In Locus Map Free, it is limited to 10 minutes.

About

ANT+ is a wireless technology of monitoring devices mutual communication. Locus Map can communicate this way with heart rate monitors, bicycle speed/cadence sensors, stride sensors and many others. More about ANT+ and supported devices [here >>](#)

A screenshot of the 'ANT manager' interface. The top bar is blue with the text 'ANT manager' and a back arrow. Below the bar, there are three sections: 'HEART RATE MONITOR' (with a heart icon and 'Sensor disconnected' status), 'BICYCLE CADENCE' (with a bicycle/cadence icon and 'Sensor disconnected' status), and 'THERMOMETER' (with a thermometer icon and 'Sensor disconnected' status). Each section has a small '...' button to its right.

Instructions of Use

- Menu > More > ANT+ Manager
- **topbar** - contains menu of connectable devices - check those you are willing to use
- the item appears in the **ANT+ manager list**. You can switch it on and start collecting data.

A list of tested and supported device is available [HERE >>](#)

Switching the device connection on may need additional download of missing ANT+ library from Google Play, depending on your mobile device.
