

Track Recording Settings

- [Menu > Settings > Track recording](#)

Recording profiles

- **Foot** - pre-defined profile. Frequency of trackpoints: 1m and 10sec. GPS accuracy: 100m. Tap to [edit the profile](#).
- **Cycle** - pre-defined profile. Frequency of trackpoints: 10m or 5sec. GPS accuracy: 100m. Tap to [edit the profile](#).
- **Add new profile** - [available only for Locus Map Pro users](#). Allows to [define a completely new profile](#) based on default values.

[More about creating and editing recording profiles here >>](#)

Global

- **Style of track recording panel** - selection between full-featured, dashboard-like sliding side panel or simple compact bottom panel
- **Automatic start** - starts track recording automatically after each Locus Map startup. Useful for thorough mapping of your training but demanding data space.
- **Training manager** - turns Locus Map into a full-scale sporttracker. Opens a dialog setting voice notifications accompanying your workouts:
 - topbar - Add a new training - adds a new notification template. Sets its icon and name.
 - list of notification templates - tapping a particular template opens the template setting dialog with distance or time trigger interval and a list of notification variables - distance, average speed etc.

Side panel

- **Auto-hide side panel** - hides side sliding panel automatically after start/stop of recording to free screen space for map
- **Number of track monitoring items** - defines number of visible track monitoring items in a grid on the panel
- **Start with countdown** - starts track recording with a pre-defined countdown from 5 to 30 seconds
