## **Geocaching Tools**

## About

Menu > More functions > Geocaching tools

Geocaching tools contain many useful options for some special geocaching cases:

- Graphic computations for better solving some of mystery caches
- 161 m circles around caches to secure a correct radius from another cache when creating a new one. More about this see here >>
- Already created field notes check and login
- etc.

## **Geocaching LIVE!**

- Load Pocket Queries see Pocket Queries in Import chapter.
- Log trackable enables logging found trackable item directly from the app (internet connection required).More about trackables >>

### **Geocaching tools**

• **Logs manager** - Locus Map can log your geocaches offline in drafts (field notes) that can be logged online later. This is the place where the drafts (field notes) can be simply managed, e.g. exported in a file or logged in Geocaching.com website.

뫝	FIELD NOTES MANAGER 🛛 👁	×
•	GC1T6EA - Tri kameny, Found it, oet 28, 2016, 13:49 2016-10-28 at 13:49, Thanks	
•	GC5B15J - Pohansko, Found it, Jul 6, 2016, 11:38 S Jurčíkama na koloprojíždce k soutoku Moravy a Dyje	
	GC5TC5E - Kúpele Červený Kl Didn't find it, Jan 13, 2016, 15:23 Wasn't lucky	
C	GC1GP8M - B-17 going down, Write note, Jan 13, 2016, 15:22 Full logbook	
•	GC50DQF - Psi olympiada, Found It, Jan 13 #1, 2016-01-13 Mark as logged	2
	Log your visit	9
	Upload field note	9
	Export to file	

You can control which drafts you want to visualize in the topbar menu:

• **Draw circle** - draws a circle with defined radius and color/opacity around any selected place on the map

O DRAW CIRCLE	×
LOCATION Map center	•
RADIUS Radius (in meters)	m
LINE STYLE Color	
CANCEL	ОК

• Line tools - draws a line between two defined coordinates or calculates an intersection point of two lines

$\leftarrow$ Line tools

Distance: 0.00 m		
Bearing: 0.00*		
	DRAW LINE	

• Middle point - sets location of two points and calculates exact center between them

	×
START POINT	
Map center	0
FINAL POINT	
GPS	0
CANCEL	ОК

• **Projection** - calculates a new point from its distance and azimuth from your location and draws it on the map. This function is available also in Location selector.

	×
START POINT Map center	۲
DISTANCE Distance (in meters)	m
аzімитн Azimuth (Degree)	Ð
CANCEL	COMPUTE

- Load all waypoints displays all waypoints of visible geocaches on the map
- **Cache radius limit** according to Geocaching.com rules, physical parts of individual geocaches may be placed at least 528ft/161m from each other. This function helps visualize such area. Locus asks which geocaches you want to highlight and offers your folder structure.

To remove the circles, turn this feature on and re-select the same cache folder. More about geocaching guidelines here >>

#### How to remove items drawn by the geocaching tools:

- tap the We Hide temp map items button in Map items screen topbar or
- long-tap the Data manager button in the Function panel and select Hide temp map

*items* oradd *Hide temp map items* button directly to your *Function panel* 

### **Geocaching offlinizer**

**Geocaching Offlinizer** is abbreviation of a more accurate **Geocaching Image Offlinizer**. The feature is not among other geocaching tools but can be found in a **Geocache detail screen** under side geocaching menu or, in case of selecting more caches, in the tools menu in the bottom bar of the point manager. To make it work follow these instructions:

- in Geocache Folder select caches you want to "offlinize"
- choose GC Offlinizer from the tools menu and a new dialog pops
- if you just want to download images that are included in cache listings do not check *Live API*. It is also much faster.
- if you need also spoilers or you are not sure if listings are complete or contain links to all images, use *Live API*. This action requires valid *Geocaching Live* login.
- if you just want to download spoilers, you have to use *Live API* and check **Only spoilers**.

#### Data storage

- all downloaded images are stored in Locus/data/geocaching directory
- a new tab **Images** is added to Geocache Detail screen, containing all downloaded images of the cache

It is recommended to clear unused images (that remain in your phone memory when you delete caches from Locus database) from time to time. Go to **Settings** > **Miscellaneous** > **Clear temporary data** and select **Unneeded geocaching data** or
