

Custom settings

Expert settings

 IN DEVELOPMENT... 

Settings that are not essential for running of the app and overall user experience. Some of these settings were removed from the main settings because of weak usage, some were found redundant and some have purpose only for advanced Locus users.

Activation

- long press Locus **main menu button**
- tap **Expert settings**
- Expert settings appears in Locus Map settings

UI/UX

Open main menu by dragging

Turning this on enables you to open Locus main menu by swiping your device screen left edge to right.

Confirm on exit

Turn this on if you need confirmation of Locus termination after double tapping hardware **back** button.

Tracks

Fill color of chart with...

Custom settings of track/route chart line colors.

Tools

- **Scroll to zoom**

- **Record sensors data**

Tweaks

- **Map hardware acceleration**
- **Allow login over Google Play Services** - when switched off, only an e-mail login to Locus Store or Live Tracking is possible.

 TO BE CONTINUED... 

Configuration file

- Since version 2.3.2 Locus Map offers advanced configuration options through *config.cfg* file stored in **Locus Map root directory** in your phone **memory**
- This file is automatically created during Locus Map first start (if it does not exist from its previous installation). Data are loaded at start and stored back to file in the end, so even if this file allows changing some settings that are also changeable in the application, settings will not be lost.

As this method has become obsolete and is quite user unfriendly, settings included in this configuration file are going to be moved gradually to the **Expert settings** section above.

Examples of some parameters

guiding_path_map_symbol

This parameter allows to define very precisely the shape and size of the guiding line. Best is to explain it on the default parameter.

Basic values are: **-8.0|-2.0|7.0|0.0|-8.0|2.0**

Imagine squared paper. Each two numbers mean X and Y coordinates. So draw them. Result will be as in the picture below. The same way you may draw whatever symbol you want.

Examples of some settings

guiding_path_symbol

guiding_path_symbol=-20|0|-20|-10|0|-10|0|-20|20|0|0|20|0|10|-20|10

guiding_path_symbol=-11|0|-14|-5|5|0|-14|5

MAP ITEMS STYLES

keyword	default
map_items_accuracy_circle_color	#0000FF
map_items_dynamic_altitude_font_size	14.0
map_items_dynamic_altitude_color	#FF0000
map_items_dynamic_altitude_color_bg	#FFFFFF
map_items_time_rings_font_size	14.0
map_items_time_rings_color	#FF0000
map_items_time_rings_color_bg	#FFFFFF
map_items_distance_rings_font_size	14.0
map_items_distance_rings_color	#C80000C8
map_items_distance_rings_color_bg	#FFFFFF
map_items_distance_rings_no_gps_color	#640000C8
map_items_distance_rings_no_gps_color_bg	#FFFFFF
map_items_heading_line_color	#EC9000
map_items_heading_line_color_bg	#FFFFFF
map_items_course_bearing_line_color	#FA3232

map_items_course_bearing_line_color_bg	#FFFFFF
map_items_line_to_gps_font_size	14.0
map_items_line_to_gps_color	#009696
map_items_line_to_gps_color_bg	#FFFFFF
map_items_guiding_font_size	14.0
map_items_guiding_color	#009696
map_items_guiding_color_bg	#FFFFFF

MAP ITEMS

keyword	default
map_items_labels_color_text	#0A0A0A
map_items_labels_color_bg_normal	#DCF0F0F0
map_items_labels_color_border_normal	#DC0A0A0A
map_items_labels_color_bg_highlight	#DCF0F0F0
map_items_labels_color_border_highlight	#DC960A0A

example of transparent label background:

```
map_items_labels_color_text=#0A0A0A  
map_items_labels_color_bg_normal=#4CF0F0F0  
map_items_labels_color_border_normal=#19F0F0F0  
map_items_labels_color_bg_highlight=#4CF0F0F0  
map_items_labels_color_border_highlight=#19F0F0F0
```

see difference (default and customized)
