

Bing, Google, Yahoo or Nokia/Ovi maps cannot be used

Locus application does not support usage of these maps as it does not comply with **terms of use** set by the providers of these maps. If you use these maps in Locus in spite of this fact, it is probably thanks to a third party add-on MapTweak or other methods that are not developed nor authorized by **Asamm Software, s. r. o.**

Asamm Software company **is not responsible for any damage** caused by Maptweak addon or other unauthorized methods of using this map data to Locus Map users nor to involved map providers.
