

# Disappearing maps, points and tracks

not finished yet

## Problem

From time to time, some users complain that their **Locus data mysteriously disappeared**. Most often, they noticed that after their system update, after restarting the phone, and of course, after the factory reset.

## Cause

### Memory cleaner

99,9% of these users are owners of **Xiaomi** od **Huawei/Honor** phones and tablets. The one and only cause of disappearing Locus data in these devices is a very **aggressive memory cleaning software**, part of MIUI or EMUI operating platforms running on these devices.

### Factory reset

Locus Map in its default settings stores its data in the **internal memory** of the phone or tablet. During the factory reset, the inner memory is **completely wiped out**.

## Solution

### Exclude Locus Map from memory cleaning
