

Augmented Reality Add-On

Use of this add-on is limited to one minute in Locus Map Free. It is fully functional in Locus Map Pro version.

About

- Add-on enables visualization of selected points on the device screen with camera view. Useful during town sightseeing tours, for geocaching or for simple guidance to any point.
- After installation it can be launched from **Menu > More > Augmented Reality**

Instructions of Use

- select the **points of interest to visualize**. It is necessary to have the needed points **downloaded** in Locus Map.

The add-on displays **map-independent POI** only (not Locus Maps POI).

- start the add-on and watch your points hover on the camera screen on their real-world positions.
- tap any point to display its name. Tap again for details (augmented reality add-on is closed by it)
