

Online Maps

Locus Map provides a wide range of online maps to work with. They are listed in the **Online** tab of the Map Manager.

Sorting

Maps are grouped according to selected sorting. To change the sorting, tap the **Sort** by button and select category.

• all maps - list of all map providers:

• countries - maps sorted according to their coverage of countries and continents:

← Maps		=			
ONLINE O ★		Smart choice

Czech Republic					

• **usage** - maps sorted according to their purpose - hiking, cycling etc.:

• smart choice - only last used and the most used maps:

Displaying online maps

To display the needed map, select the group to unfold and tap the map. The selected map name highlights red.

If you select a map for the first time, an **information screen** appears.

Customizing online map list

•

The list of available online maps can seem too complex for somebody but it can be easily reduced so that the user sees only the maps he/she actually uses:

Settings in the topbar	Actio	n menu,	select Avai	lable ma

• another way how to hide a map from the list is to select the *Hide* option from the **action** menu at each single map.

: Action menu button

Each map has its own action menu, consisting of following items:

- 1 Details display the Information screen
- Download launches online map download
- Uset 'Valid for'(visible only for cacheable maps) defines validity time for cached map tiles in hours. When the validity time expires, Locus Map caches a new map tile.
- Elear Cache deletes all cached tiles in your temporary storage
- A Pre-Paid (only for Wanderreit maps) displays a form to fill in the pre-paid Wanderreit map code
- Cancel subscription cancels your Wanderreit map subscription
- **WHide** removes map from the list. It can be reversed in Map Settings.

Paid online maps

Some maps (e.g. Outdooractive online or IGN online) are accessible only after payment for **subscription**. After displaying their detail screen and confirmation you are prompted to purchase some kind of subscription - monthly or annually. The purchase is processed via **Locus Store**.

After submitting the payment the access is open.

Adding online maps

If you miss some online map of your preference, you may look it up in the **Locus Store**. So as to keep the online map offer in order, Locus Map stores some less known or less used online maps "aside" right there.
