Notification center

This is the place where **all announcements from Locus app, its developers or various actions** are displayed. E.g. when you download maps, routes or elevation data from **Locus Store**. Or when there are some news on Locus website, or when Locus reminds you of remaining map gifts, informs about polls, sends messages from devs etc.

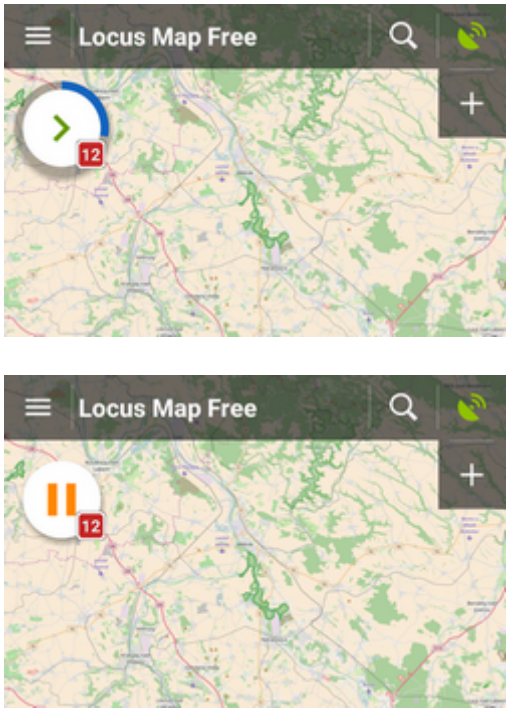

Its icon/button appears in the upper left corner of the main screen:

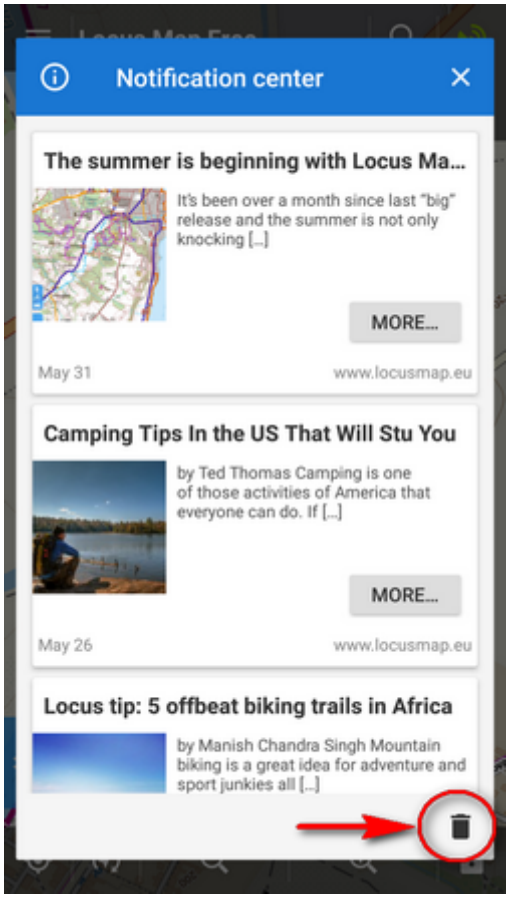

When you **tap** the button you unfold the list of announcements:

The icon/button **changes its appearance according to some actions in background**. E.g. it works as a downloading indicator:

Individual announcements can be **swiped away** from the list. **The whole box can be emptied and notification center icon deactivated** by tapping a button in the bottom of the news list:

When nothing is to be announced, the notification center icon/button is not visible.
