Main Menu Setting

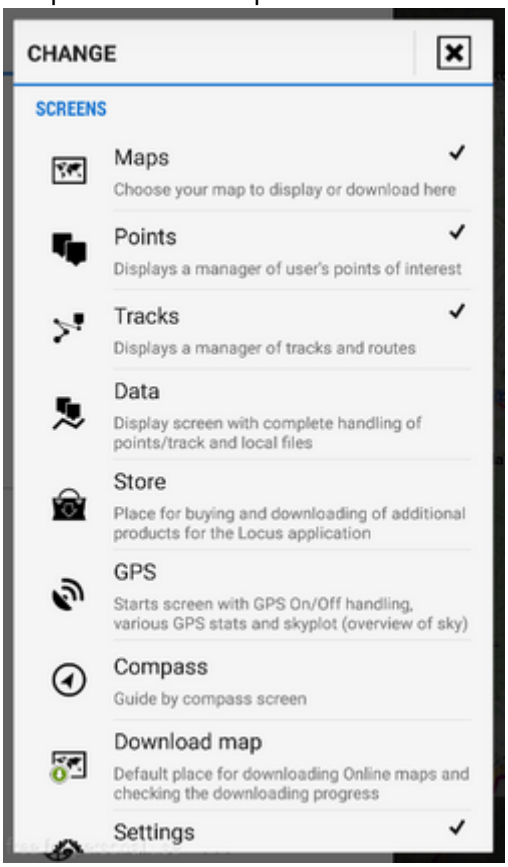

Main Menu

The first five buttons of Locus Map's main menu can be set according to your needs (similarly to the Functions Panels):

- open the Main menu
- long tap any of the first five main buttons

- select another function from the portfolio and tap it

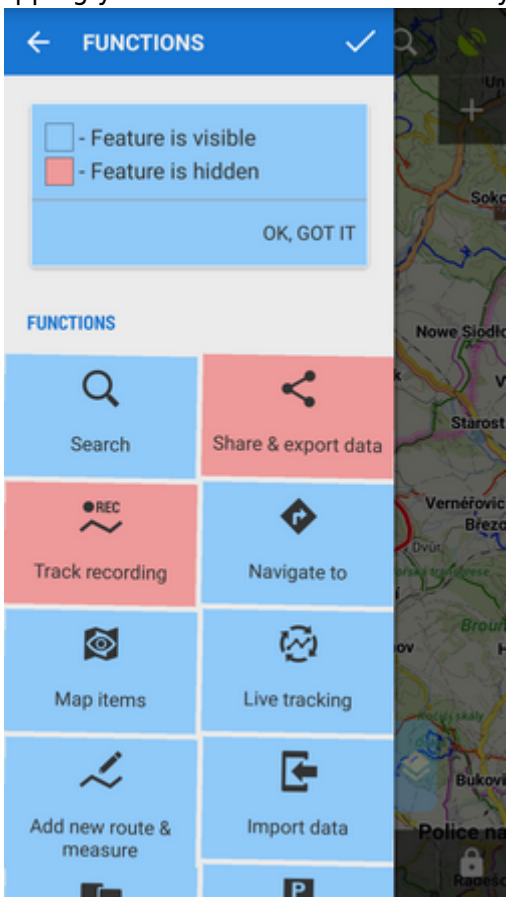

- the button shortcut has been changed

Menu > More

Another part of the Main Menu can be displayed by the → **More** button. By default, this section contains **all features and functions** Locus Map provides which can be a bit too complex for somebody - it is possible to activate only those buttons of features you are going to use and others deactivate. It's simple:

- tap ✎ button in the upper bar
- active buttons are blue - by tapping you can deactivate them - they turn red

- confirm by ✓ button
- the red-highlighted buttons disappeared from the menu > more

The settings can be changed any time - turn the red buttons into blue and activate them.
