Quick Settings

About

Quick Settings button enables direct and fast switch of several settings options. It can be placed in some of the Function Panels for even quicker access.

Quick Settings Window

Consists of a grid of the most used settings shortcuts. The grid is fully customizable:

- **adding buttons** - tap the pencil button in the topbar and select from a wide range of settings to link to (check)
- **removing buttons** - long-tap the item you want to remove and select “Remove”
- **sorting buttons** - you can freely tap-drag-drop the buttons to change their order (available from the Android 3.0+ version)

The settings linked by the Quick Settings are launched by tapping the buttons immediately without further confirmation.

Available Settings Shortcuts

- .... Fullscreen - hides system panel
- .... Screen On/Off Control - sets turning the screen on/off by gestures or by the application
- .... Always Screen On - enables permanent screen on
- .... Enable Address Search - searches addresses by long-tapping the map screen
- .... Shift Map Center - moves the map center crosshair down by 1/4 of the screen
- .... Time Rings - displays rings indication estimated distance passed according to current speed
- .... Distance Rings - displays rings indicating various distances from current position
- .... Dynamic Altitude - displays altitude at the map screen center
